

BAZIL HASSAN

Senior iOS Engineer | Lead iOS Developer | Mobile Engineer

+92 304 531 6883 | bazilhassan13@gmail.com | Lahore, Pakistan | linkedin.com/in/bazil-hassan

PROFESSIONAL SUMMARY

Senior iOS Developer with 6+ years of experience building, improving, and shipping production mobile applications across healthcare, fitness, coaching, fintech, media, productivity, legal-tech, and real-time communication. Experienced across the complete mobile development lifecycle, including solution architecture, feature development, REST API integration, debugging, performance optimization, App Store deployment, and production support. Strong background in Swift, SwiftUI, UIKit, Objective-C, React Native, AVFoundation, LiveKit, WebRTC, Twilio, Firebase, MVVM, VIPER, and Clean Architecture. Proven ownership of complex camera, spatial video, live-streaming, AI-assisted workflow, payment, media playback, and real-time communication features, with experience leading iOS engineers and mentoring junior developers.

TECHNICAL SKILLS

iOS & Mobile: Swift, Objective-C, SwiftUI, UIKit, React Native, visionOS, Combine, Grand Central Dispatch (GCD), Async/Await

Architecture: MVVM, VIPER, Clean Architecture, reusable frameworks, modular feature design, protocol-oriented development

Media & Real-Time: AVFoundation, custom camera pipelines, spatial photo/video, stereoscopic capture, video transcoding, LiveKit, WebRTC, Twilio, Socket.IO, WebSockets, audio/video playback

Data & Backend: REST APIs, Firebase, Firestore, Core Data, Realm, API caching, error handling, authentication, subscriptions, payments, push and local notifications

Tools & Delivery: Xcode, App Store Connect, TestFlight, Fastlane, code review, Agile, Scrum, production debugging, performance optimization, release management

PROFESSIONAL EXPERIENCE

Uverse Digital

Jun 2025 – Present

Lead iOS Developer / Senior iOS Developer

Remote (UK)

- Lead a team of 3 iOS engineers building OPIC3D, a spatial camera and live-streaming application, including its custom camera system from the ground up.
- Develop standard and spatial photo and video capture with AVFoundation, including stereoscopic capture and spatial metadata for Apple Vision Pro playback.
- Implement manual focus, autofocus, custom zoom controls, multiple camera modes, and real-time camera preview.
- Build spatial video transcoding for synchronized left-eye and right-eye 3D playback and optimize media processing latency by approximately 40% through session refactoring.
- Ship LiveKit-powered 2D live streaming with real-time audience comments and a custom in-stream keyboard while contributing to 3D live-streaming capabilities.
- Architect maintainable production features using Swift, SwiftUI, UIKit, MVVM, and Clean Architecture.
- Integrate complex REST APIs with caching and error-handling strategies to improve app stability and reduce API-related failures.
- Collaborate with product, design, and QA teams across multiple time zones in Agile/Scrum delivery cycles.

3S Solutions Pvt. Ltd.

Oct 2022 – May 2025

Senior iOS Developer / Senior iOS Engineer

Lahore, Pakistan

- Built core features for Sibme, a production video-coaching SaaS platform, as one of 4 iOS engineers supporting a 50+ person organization.
- Delivered 10+ major features across multiple development sprints, including file and folder management, audio recording, and reliable background audio handling.
- Implemented AI-assisted forms and questionnaire workflows for coaching use cases and resolved production issues in an established codebase.
- Refactored AVFoundation media pipelines, reducing video buffering by 30% and improving playback reliability.
- Owned feature delivery across architecture, implementation, code review, debugging, App Store deployment, and production support.
- Introduced Fastlane and TestFlight automation, helping move releases from bi-weekly to weekly and reducing manual release effort by 50%.
- Established code review practices and mentored junior developers to improve implementation quality and reduce regressions.
- Built the native iOS module and React Native bridge for Mr. Rebounder's 3D exercise and timer-based workout flows.

Tiksom Pvt. Limited

Mobile App Developer / iOS Developer

Sep 2020 – Sep 2022

Lahore, Pakistan

- Developed and launched 4 production iOS applications across fintech, wellness, productivity, and marketplace domains, including Stonks Trading, Verideal, Tap for Joy, and Weeks.
- Architected Stonks Trading with secure authentication, real-time portfolio management, crypto and fiat workflows, and banking integration.
- Served as the sole iOS developer for Weeks: Habit Tracker, independently building the core UI and data layer.
- Integrated Firebase Firestore for real-time storage and synchronization and developed nested collection/table views, calendar-based habit tracking, date calculations, and visual progress graphs.
- Integrated Objective-C bridging, OpenCV, and AVFoundation for Verideal's high-accuracy V-CODE anti-counterfeiting scanner.
- Built backend integration and payment flows for a rental marketplace application, including complex API parsing and delegate-based communication.
- Developed audio/video playback and premium content access for Tap for Joy, a meditation and audiobook application.

FrizHub

iOS Developer / Mobile App Developer

May 2019 – Aug 2020

Lahore, Pakistan

- Shipped 4 production iOS applications across health-tech, social, and legal-tech domains and contributed across the full mobile development lifecycle.
- Integrated Twilio-powered video consultations, doctor-patient chat, and real-time communication for Hyphen, a telemedicine application.
- Implemented OTP authentication and coordinated multiple asynchronous API calls using Grand Central Dispatch.
- Built post creation, editing, deletion, pagination, and content feeds for Buble and implemented real-time chat and comments using Socket.IO and WebSockets.
- Developed backend-driven dynamic forms, document attachments, authentication flows, and push/local notifications for Wakeel Online.
- Delivered Realm-backed offline features for Patient Declaration to support reliable use in low-connectivity environments.
- Mentored 2 junior developers while collaborating with iOS team members on feature delivery and production fixes.

Expert System Solution

iOS Developer / Jr. iOS Developer

Sep 2018 – Apr 2019

Lahore, Pakistan

- Developed and shipped two production iOS applications: Epose Restaurant iPad App and WTD Wholesale Tire Distributions.
- Designed an iPad-optimized restaurant management interface and implemented e-commerce features including product search and authentication.

mindsIab

Jr. iOS Developer

Mar 2018 – May 2018

Lahore, Pakistan

FEATURED PROJECTS

OPIC3D / Spatial Camera App

2025 – Present

- Spatial photo and video capture, stereoscopic left/right processing, spatial metadata, real-time camera controls, video transcoding, and LiveKit-powered streaming.

Sibme – Video Coaching Platform

2022 – 2025

- File and folder workflows, background audio recording, AI-assisted forms and questionnaires, media pipeline optimization, production support, and App Store releases.

Stonks Trading – Crypto & Banking

2021 – 2022

- End-to-end crypto and fiat trading application with secure authentication, real-time portfolio functionality, and banking integration.

Hyphen – Telehealth Platform

2020

- Twilio-powered video consultations, doctor-patient chat, OTP authentication, push notifications, and asynchronous API coordination.

Verideal – V-CODE Scanner

2022

- High-accuracy anti-counterfeiting scanner using OpenCV, AVFoundation, Objective-C bridging, and camera-based code validation.

EDUCATION

University of Sargodha

Bachelor of Science in Computer Science (BSCS)

2013 – 2017

Lahore, Pakistan

LANGUAGES

Urdu: Native

English: Professional working proficiency
